ABOUT ME.

As a beginner web developer, I am excited to start my career in this field and eager to learn as much as I can. I have a strong foundation in HTML and CSS and am proficient in the use of JavaScript and jQuery. I have completed coursework in web development and have completed several projects using these technologies. In addition to my technical skills, I have excellent problem-solving and communication skills, which I have developed through working on group projects and collaborating with my classmates. I am highly motivated and dedicated, and I am looking for an entry-level web development position where I can continue to learn and grow as a developer.
